PROFILE

Data Analyst with over 10 years' experience transforming complex business data into actionable insights through reporting, analysis and problem-solving, supported by extensive experience within finance-related software environments. Currently expanding my expertise through the Cambridge University Career Accelerator, a Master's Level (Level 7), non-credit-bearing programme in Data Science, Machine Learning & Artificial Intelligence. My recent work focuses on forecasting, machine learning and applied AI, and I am seeking opportunities across Data Analytics, Forecasting, Business Intelligence and Applied AI where I can combine strong commercial understanding with modern analytical techniques.

WORK EXPERIENCE

Program Tester / Data Analyst | Modus IT Ltd, June 2013 - Present

Played an integral role in the design, development and ongoing enhancement of bespoke accounting software, contributing to several major system iterations.

- Built filters, reports and interactive dashboards to deliver accurate insights that drive business decisions and support financial oversight.
- Used Power BI to build reports and test data accuracy, ensuring reliable and actionable intelligence for clients.
- Conducted detailed data analysis and validation using advanced Excel techniques including formulas, pivot tables and data modelling.
- Introduced AI-powered features to improve user experience and streamline workflows.
- Partnered with customers and internal teams to identify data patterns, uncover missed income opportunities and highlight key drivers of profitability.
- Contributed to stakeholder discussions to shape new functionality, create testable plans and deliver actionable insights.
- Focused consistently on improving system usability, accuracy and quality of output for end users.
- Used Excel, Power BI, Outlook, Teams, Azure DevOps and Word to manage and deliver projects.

Financial Director | Sapphire First Aid Limited, December 2014 - December 2015

Provided financial oversight and governance for a start-up through a part-time Financial Director role.

- Established financial governance frameworks and structured financial record-keeping processes that reduced risk and supported compliance.
- Delivered day-to-day bookkeeping using Xero, maintaining accurate and compliant financial records.
- Produced and delivered end-of-year accounts, providing clear financial transparency to stakeholders.
- Developed financial understanding within the leadership team through clear communication and guidance.

Bookkeeper (Volunteer) | Rugby Fitted Kitchens, February 2014

- Managed invoicing processes using Sage 50, covering a leave of absence.

SKILLS

Data Analysis & Visualisation

- Power BI: Report building, dashboard creation and interactive visualisations.
- Excel: Advanced formulas, pivot tables, data validation, modelling and analysis.
- Python: Forecasting, machine learning and data analysis projects using pandas, NumPy, scikit-learn, TensorFlow and related libraries.

Technical & Software

- Azure DevOps, Outlook, Teams and Word.
- Accounting software: Xero, Sage 50 and bespoke accounting systems.
- Data management: validation, integrity checking and pattern recognition.

Core Competencies

- Data-driven decision making.

- Process improvement and system optimisation.
- Stakeholder engagement and collaboration.
- Financial governance, risk reduction and compliance.

EDUCATION

Cambridge University Career Accelerator | October 2025 - September 2026 (In Progress)

Master's Level (Level 7), non-credit-bearing programme in Data Science, Machine Learning & Artificial Intelligence. Developing skills across forecasting, machine learning, artificial intelligence and Python programming.

Ashlawn School | 2012 - 2014

- A-Levels in Accountancy & Business.

Avon Valley School | 2007 - 2011

- 10+ GCSEs including Maths, English, Science, IT & Statistics.

ADDITIONAL INFORMATION

Professional Development: Committed to continuous learning in data analytics, machine learning and modern data science methodologies, with a focus on practical projects and business application.

Interests: Football (English & American), hiking and travelling.
